Portfolio

PROFESSIONAL PROFILE

Front-End Developer with Back-End experience, skilled in creating modern, accessible, and optimized interfaces, specializing in JavaScript (ES6+), TypeScript, Vue.js, React.js, Vite, and Tailwind CSS, Java, SpringBoot, and Databases. Also knowledgeable in Web3, Smart Contract development with Solidity and Foundry, as well as process automation with Zoho CRM.

Passionate about developing efficient, scalable, and visually appealing solutions, combining a user experience (UX/UI) oriented approach with best practices in architecture and performance optimization. Additionally, I am self-taught and proactive, always seeking new technologies and methodologies to improve the quality of digital products.

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Training and Personal Projects)

January 2024 - December 2024

Development of mini-applications and websites using JavaScript, Vue.js, React.js, Vite, and Tailwind CSS.

Advanced learning in design, structuring Front-End projects, and performance optimization.

Development of Smart Contracts in Web3, specializing in Solidity and Foundry for creating smart contracts.

Front-End Developer and Web Designer

7EXPERTS, Barcelona

November 2020 - January 2024

Creation and renovation of the corporate website with Duda CRM, Zoho Marketing, Google Ads, Semrush, and HubSpot.

Development of calculation modules in JavaScript, CSS, and HTML for the Tax and Supply Chain areas.

Process automation with Zoho CRM, Deluge, and WorkFlow to improve team efficiency.

Production of graphic and audiovisual content for marketing with Canva, Adobe XD, and DaVinci Resolve.

Technical support and webinar programming.

Full-Stack Developer

TRINOV, Paris

June 2018 - September 2019

Development of SaaS applications with Ext.js, ES6, Java, SpringBoot, and MySQL.

Optimization of relational databases and system performance improvement.

Refactoring and versioning to improve the speed and security of existing applications.

Participation in the entire software development cycle: specifications, mockups, activity diagrams, and production.

Work under Agile methodology.

Junior Developer (Personal Project)

2017 - 2018

Development of web pages with JavaScript, CSS, and HTML to understand the fundamentals of web development.
